

Wanted: Daughter wants information about her father, a Nail FAC 1968-69

Hi there, I am writing a book about growing up with my father, **Capt Donald Luna**, being **MIA**. He was an FAC (23rd TASS, call sign Nail 33) out of Ubon in 1968-Feb 1, 1969.

Can you all help me with some research? I'd like to know 1) whether it's true that pilots flying out of Thailand over Laos were not supposed to carry ID or wear dog tags, and 2) What are the specific items my father would have had with him -- equipment, weapons, anything you can think of... I understand he flew in an O2-A, sometimes days and sometimes nights. Thanks in advance for any insight!

Cathy Luna
